March 7 or 9
Open if needed

Papers: Cover the discovery of your chosen body/system, the missions there, data collected the resulting investigations and conclusions. Outstanding questions to be addressed by future studies/missions. What's unique here?

Be sure to use peer-reviewed literature, although some authoritative websites may be appropriate on mission details.

References, give full citation: Authors, full title of paper, journal, volume, pages, year.

Final Papers Due: 5PM Monday, March 7th (end of final week of classes)
